CHARLES OROLFO

UI/UX Designer & Developer

orolfocharlie@gmail.com | github.com/CharlesOrolfo | linkedin.com/in/charlesorolfo | +1 (775) 343-8979

SUMMARY

UI/UX-focused developer with 3 years of academic experience designing and building intuitive user experiences across web and interactive applications. Passionate about improving usability, accessibility, and workflow efficiency through user-centered design.

EDUCATION

University of California, Irvine | Irvine, CA | September 2023 - Expected June 2027

- Bachelor of Science in Informatics
- Relevant Coursework: Human Computer Interaction, User Interaction Software, Application Design, Advanced Topics in UI, Information Visualization, Requirement Analysis & Engineering

Projects

Sound Ethics Audio Wellness App | UI/UX Designer & Developer | Irvine, CA | Sep. 2026 – Present

- Designing and developing a personalized audio-wellness app for focus and relaxation through customizable soundscapes
- Prototyping sound-mixing interfaces and user flows in Figma with an emphasis on intuitive, low-stimulation interaction
- Researching competing apps and user interaction patterns to inform personalization features and design decisions
- Collaborating with a 5-person team and Sound Ethics stakeholders to integrate curated audio and generative AI

CKI at UCI Website Redesign | UI/UX Designer & Developer | Remote |June 2025 - September 2025 & June 2026 - September 2026

- Redesigned 8 pages in Figma and built 20+ reusable UI components for accessibility and visual consistency.
- Conducted stakeholder interviews to identify retention barriers and guide a more engaging homepage redesign
- Rebuilt 3+ responsive pages using Angular, Node.js, Express, HTML, CSS, and JavaScript
- Collaborated in a 6-person Agile team using Git and code reviews to deliver frontend and accessibility improvements

UCI WebReg Redesign | UI/UX Designer | Irvine, CA |April 2026 - June 2026

- Redesigned UCI's course registration experience to simplify navigation, course discovery, and schedule planning
- Mapped existing registration workflows and developed personas, journey maps, and interactive Figma prototypes
- Established a cohesive design system with reusable components, typography, and WCAG-compliant color palettes
- Evaluated prototypes with 3 users, incorporating usability findings to refine navigation and registration workflows

Shift Change! | UI/UX Designer & Developer | Irvine, CA | April 2025 - June 2025

- Developed 10+ modular UI components in Godot to support consistent interfaces across 4 rotating minigames
- Designed responsive interface layouts that supported 4 rotating minigames with consistent visual clarity
- Coordinated with artists and developers through GitHub to integrate interface assets into the game
- Refined gameplay interfaces through 3 rounds of playtesting, addressing usability and visual clarity issues

Wareware | Developer | Irvine, CA | January 2024 – March 2024

- Programmed 3 WarioWare-inspired microgames in Unity using C#, implementing core mechanics and player interactions
- Developed difficulty-scaling systems that increased gameplay speed and challenge as players progressed
- Implemented scene transitions, animations, audio, and interactive gameplay elements
- Collaborated with a multidisciplinary team and iterated on gameplay based on feedback from 50+ playtest participants

SKILLS

Programming: C/C++, C#, Java, Python, JavaScript, R, HTML, CSS

Frameworks & Technologies: React, Angular, Node.js, Express

Tools & Platforms: Git, GitHub, Figma, Trello, Canva, Excel

Design & Development: UI/UX Design, Front-End Development, Prototyping, User Research, Usability Testing, Accessibility
